

If You Stay

Rosi Golan

If you stay, if you stay
I'll sing you to sleep
I will say, words of flame
Words that keep you

Warmer than you
Allow yourself to be
If you stay, if you stay
I'll sing you there

If you lay, if you lay
Your head where my pulse is
Hear the blood map its way
Through the veins 'round our bodies

Know something
Keeps us breathing while we sleep
If you stay, if you stay
I'll sing you there

Come what may, come what may
For nothing can change this
Gravity does its thing
And pulls us nearer

Where our machines
Find the place they're meant to be
If you stay, if you stay
I'll sing you there

So darlin' come closer, closer here
Darlin' come closer, closer here
Darlin' come closer, closer here
(Where our machines will find a place they're meant to be)
Darlin' come closer, closer here
(Where our machines will find a place they're meant to be)
Darlin' come closer, closer here
(Where our machines will find a place they're meant to be)
Darlin' come closer, closer here
(Where our machines will find a place they're meant to be)

If you stay, if you stay
I'll sing you to sleep
