

## New Year

Ross Copperman

Sun is out and rush to the window  
Suddenly you just wanna let go  
All the past start all over again  
So I say

Come on open your eyes  
And see what's outside  
There's nothing to fear  
It's a New Year  
It's a New Year

Snow is falling beautifully white  
Nothing but blue skies and green lights  
Doors are open nothing in the way  
Let's make a list of things we wanna do  
No breaks allowed it's parachute  
Don't down let's jump and fly away  
And we sang

Come and open your eyes  
And see what's outside  
There's nothing to fear  
It's a New Year  
It's a New Year, oh

Come and open your eyes  
And see what's outside  
There's nothing to fear  
It's a New Year  
It's a New Year
