

Somewhere There's A Light On

Ross Copperman

When it's midnight at the ball
When your white horse takes a fall
And you don't know who to call, you can call me
When there's makeup on your shirt
And your compass doesn't work
If you need me I can cure, your curiosity

When you're lost, when you're cold
When you can't see the road
When the sky runs out of gold
And you need a ride home
Take your time, feed your soul
If you ever find yourself alone
And you need a place that feels like home
Somewhere there's a light on

When heaven's kinda starless
And the world is kinda heartless
When you're reaching in the darkness
Somewhere there's a light on

(Somewhere there's a light on
Somewhere there's a light on)

When your faith is on its knees
No ace left up your sleeve
And the lonely just won't leave you alone
Yeah, when you're talking in your sleep
The secrets you don't wanna keep
They're always safe with me, so let 'em go

When you're lost, when you're cold
When you can't see the road
When the sky runs out of gold
And you need a ride home
Take your time, feed your soul
If you ever find yourself alone
And you need a place that feels like home
Somewhere there's a light on

When heaven's kinda starless
And the world is kinda heartless
When you're reaching in the darkness
Somewhere there's a light on

(Somewhere there's a light on
Somewhere there's a light on)

And it'll lead you right home
When the sun burns out and the signs are wrong
Somewhere there's a light on
(Somewhere there's a light on)

When you're lost, when you're cold
When you can't see the road
When the sky runs out of gold
And you need a ride home

Take your time, feed your soul
If you ever find yourself alone
And you need a place that feels like home
Somewhere there's a light on

When heaven's kinda starless
And the world is kinda heartless
When you're reaching in the darkness
Somewhere there's a light on

(Somewhere there's a light on
Somewhere there's a light on)
