

# Vertigo

Ross Copperman

I don't want somebody inside every line  
I don't want someone to say everything right  
Cause I need to start feeling like I settle for settling down,  
yeah  
I need to feel love isn't just a knot tied around, and round

Baby, you leave me spinning while I'm standing still  
Even if it ends, the fall never will  
I need your love to take me somewhere, so high  
I can't let go

Pour and pour until it all just overflows  
Let me drink you till I can't find my way home  
Baby, keep on swaying in the last [?] of the night, yeah  
Till I feel you moving, laying quiet in the morning light, yeah

Baby, you leave me spinning while I'm standing still  
Even if it ends, the fall never will  
I need your love to take me somewhere, so high  
I can't let go  
My vertigo  
My vertigo

I need to feel your heart beating  
We staying or leaving?  
Oh I need you to stand up and to show what love was  
I need to feel your heart beating  
You staying or leaving?  
Oh I need you to stand up and to show what love was  
Yeah to show what love was  
To show what love was
