

Starlight

Rostam

All the stardust in you
Has been there before time
And when I get to see you
The glow slips in my mind

That's how I float
When you're near Earth slows
And I get a feeling like I'm coming up from underwater

'Cause it's starlight
Whenever you're around me
Starlight
Whenever we hang out
Starlight
A hundred sparks surround me
Starlight
I want to slow it down
But I can't

All the windows open
A breeze comes through the room
And carries me out gently
Up towards the moon

That's how I float
When you're near Earth slows
And I get a feeling like I'm coming up from underwater

'Cause it's starlight
Whenever you're around me
Starlight
Whenever we hang out
Starlight
A hundred sparks surround me
Starlight
I want to slow it down
But I can't

'Cause it's starlight
Whenever you're around me
Starlight
Whenever we hang out
Starlight
A hundred sparks surround me
Starlight
I want to slow it down
But I can't
