

Fire Within

Royal Bliss

Its never easy to
Try and make it through
Sometimes you gotta go your own way
They want to break you down
Until you level out
So take the punches, it don't matter what they say

Stand up
And don't you ever back down

Yeah, I will build you up
Though the mountains tough
Keep on climbing
And don't you look back down
There'll be some stumbling
There'll be some crumbling
Pick up the pieces
And put back down now

Hold on
And light the fire within

You've got that fire
You've got the fire within
Go on and light it up
Show your stuff
Tell em what your dreaming of
This is how your story begins
You've got that fire...
You've got that fire...

Go out and see the world
Make a million friends
Don't let them tell you
You can't do it your way

Go out and make mistakes
Yeah, you will learn from them
Another lesson
That's the price we pay

Just hold on
And light the fire within

You've got that fire
You've got the fire within
Go on and light it up
Show your stuff
Tell em what your dreaming of
This is how your story begins
You've got that fire...
You've got that fire...

We all have scars, we fight so hard
Feel it burn down deep in your heart
Now let it burn, burn, burn, burn

You've got that fire
You've got the fire within
Go on and light it up
Show your stuff
Tell em what your dreaming of
This is how your story begins
You've got that fire...
You've got the fire within
You've got that fire...
You've got the fire within
You've got that fire...
