

Control

Royal Tusk

It's done to death
Bring on that bad moon rising
No going back to how it was before
Collect your children and your prized possessions
The new disaster you were looking for

Come in and see me
Sit down and stay
If you can't handle
It's best you look away

No
You don't need to stand there for anyone
Not your war you're fighting
Lay down your gun
Lay down your gun
Lay down your gun
It's vindicated

No need to worry
It's just deprivation
It's our own business and it's here to stay
Holy machines raping teens on contract
Say please and thank you the american way

Come in and see me
Sit down and stay
If you can't handle it
It's best you look away

No
You don't need to stand there for anyone
Not your war you're fighting
Lay down your gun
Lay down your gun
Lay down your gun
It's vindicated

No
You don't need to stand there for anyone
Not your soul they're saving
But preying on
They're preying on
They're preying on
They're preying on
It's vindicated

Sell out your family
Search for absolution
Don't fear, come closer when you're seeking more
Drink down the words and promises like potion
If It's redemption that you're looking for

No
You don't need to stand there for anyone
Not your war you're fighting
Lay down your gun

Lay down your gun
Lay down your gun
It's vindicated

No
You don't need to stand there for anyone
Not your soul they're saving
But preying on
They're preying on
They're preying on
They're preying on
It's vindicated
