

# I'll Wait

Royal Tusk

To be honest you had it right from the start  
You call me "pig" and it wasn't that hard  
You know me better than I know myself  
You know me better than no one else  
To be honest you caught me so off guard  
And just like that it all fell apart  
You know me better than I know myself  
You know me better, that don't matter no more  
No more

Like you promised you headed straight for the heart  
It's what I wanted right from the spark  
I'm trying hard but I can't slow down  
I saw you coming but I had no way out  
So be honest, how did we end up here?  
With every seconds I go passing here  
So listen, nobody's winning when we're keeping score  
You know me better, that don't matter no more

Have I ever asked you to stay awake, awake  
Through the whole night?  
Never really, you've been awake, I'll wait  
I'll give it till daylight  
I'll wait in the whole night  
I'm waiting  
I'm waiting the whole night  
Hey!

At its darkest it feels like time stands still  
Try to forget you, girl, you know I will  
You know me better than I know myself  
You know me better but that don't matter no more

Have I ever asked you to stay awake, awake  
Through the whole night?  
Never really, you've been awake, I'll wait  
I'll give it till daylight  
I'm waiting

I'm finding now that you could never feel me  
I'm someone else that you could never beg to see  
I'm missing now 'cause you're the only one of me  
I'm someone else, I'm someone else without you  
Without you  
Listening

Have I ever asked you to stay awake, awake  
Through the whole night?  
Never really, you've been awake, I'll wait  
I give it to daylight  
I'm waiting  
Have I ever asked you to stay awake?  
I'll give it till daylight  
I'll wait in the whole night  
I'm waiting  
I'm waiting the whole night  
I'm waiting

I'm waiting the whole night  
I'm waiting  
I'm waiting the whole night
