

You're far more cooler than your body could've known
I'll be your playgirl, could leave me on the floor
If only love weren't the neighbours on your street
You're far more cooler, the flavour of the week

'Cause I need your love
Save my body, step on me
Save my body, step on me

Cheese won't melt in the fire
Please, don't turn into milk
Chilli hit, sweet in the sugar
If only I'd speak, if only

'Cause I want your love
Save my body, step on me
Save my body, step on me
'Cause I want your love
(Your love, your love, your love, your love)
Save my body, step on me
Save my body, step on me

But I don't think we can take much more
When I don't think we can take much more
You keep us waiting, keep us waiting
But I don't think we can take much more
When I don't think we can take much more
You keep us waiting, keep us waiting

You're far more cooler than your body could've known
I'll be your playgirl, could leave me on the floor
If only love weren't the neighbours on your street
You're far more cooler, the flavour of the week

'Cause I need your love
(But I don't think we can take much more)
(But I don't think we can take much more)
Save my body, step on me
Save my body, step on me
'Cause I need your love
(But I don't think we can take much more)
(But I don't think we can take much more)
Save my body, step on me
Save my body, step on me
