

## Say Something

Royel Otis

Got me in my head again  
Kinda wanna call you out  
Said you wanna be alone  
Feel like driving

Overthinking everything  
Silence always stressed me out  
I'm not gonna let this go

So what do you want from me? What do you need?  
Can you say something? Say something  
I'm trying to work it out before you leave  
Then say something, say something

Stay up drinking anything  
Maybe you should take a nap  
Maybe you should sleep it off  
Before deciding

Sucking all my energy  
And even though you wear me out  
I'm not gonna let this go

So what do you want from me? What do you need?  
Can you say something? Say something  
I'm trying to work it out before you leave  
Then say something, say something

Not enough time, not enough time, never enough  
Not enough time, not enough time, not enough  
Not enough time, not enough time, never enough  
Not enough time, not enough time, not enough

So what do you want from me? What do you need?  
Can you say something? Say something  
You know I'm trying to work it out before you leave  
Then say something, say something
