

Shut Up

Royel Otis

Feel your eyes glowing
Through my window, I fall down
River runs wild
But I will not hold it back

Shut up, don't go away now
You know I need you
I like to wrap my arms around you
Let all the rain pour down
No cover needed
Go light another one that flames around you

Let us die young again
Wake up while you're still breathing
Give up what's on your plate
Live and die while we're still dreaming

Shut up, don't go away now
You know I need you
I like to wrap my arms around you
Let all the rain pour down
No cover needed
Go light another one that flames around you

Shut up, don't go away now
You know I need you
I like to wrap my arms around you
Let all the rain pour down
No cover needed
Go light another one that flames around you
