

Give Birth to the Sun

RPWL

Give birth to the sun to light up the sky
In the dark before dawn, in the cold of the night
It happened before the beginning of time

When all was there as one
The darkness and the sun
The knowledge of the gods
So perfectly clear

Search for the truth with your all seeing eye
Moving the world with the power inside
A world long before the beginning of time

When all was there as one
The darkness and the sun
The knowledge of the gods

Lay down on the islands of heaven

Feel that we are of the sun
Look to the stars and keep this love forever
Fly into the arms of love

Lay down on the islands of heaven
Feel that we are of the sun
Look to the stars and keep this love forever
Fly into the arms of love

When all was there as one
The darkness and the sun
The knowledge of the gods

Lay down, dive into the horizon
Dancing 'till the day is gone
Look to the stars, you won't leave this world forever
A new birth in the break of dawn
