

# Light of the World

RPWL

Light of the world  
I am looking for the answers we'll never know  
Light of the world  
Can you bring me through 'till the shadows are getting short

Feel you, reach you  
Hold you and learn to fly  
See you, touch you  
Meet you to soar the sky

Light of the world  
Let the flowers bloom and make us thrive  
Light of the world  
Your energy is what we hope to find

Feel you, reach you  
Hold you and start to play  
See you, touch you  
Need you to point the way

Listen to that song  
You never heard before  
Yet the sound is so familiar  
You, once you pass through that door  
Seasons they pass  
Change will be fast  
But time will never wait till it is gone forever

Light of the world

Radiating from the sun to give us life  
Light of the world  
Infusing everything beneath the sky

Feel you, reach you  
Hold you and learn to fly  
See you, touch you  
Meet you to soar the sky

Orbiting time  
Banish the darkness with your dawn  
Circle of time  
Always present, you are here and never gone  
Sole one of RE  
You give us strength to survive

Feel you, reach you  
Hold you and start to play  
See you, touch you  
Need you to point the way

Listen to that song  
You never heard before  
Yet the sound is so familiar  
You, once you pass through that door  
Seasons they pass  
Change will be fast

But time will never wait till it is gone forever
