

Moonflower

RPWL

When I start to crawl across the sky
Will you stay by my side
When I start to sail across the sea
Will you be there to wait for me

As long as we can feel
That love is in the air
Come and lay down by my side
Cause I will care for you

Moonflowers are colored red for you
Sunshine brings us up again
After we had loved for the first time
In this light

Now that our love has gone away
Time goes by day by day
I dream of one more look into your eyes

All to lead you by surprise

As long as I can feel
That love is in the air
To guide way you back to my life
Cause I will care for you

Moonflowers are colored red for you
Sunshine brings us up again
After we had loved for the first time
In this light

For you
Moonflowers are colored red for you
Sunshine brings us up again
After we had loved for the first time
In this light
