

## Not Our Place to Be

RPWL

Waving our arms as we're touching the ground  
So curious after years of traveling outer space  
Now we're standing on Earth, a green world to behold  
Cities of light, life and hustle of the human race

Uh that's the way they do it  
That's the way they feel  
A planet that could offer more than you will ever need  
Uh that's the way they do it  
That's their place to be  
It seems we've found the brightest place in our galaxy

Now for a year we've watched their life  
A world of people full of lies  
And all their misplaced fear that  
Makes them hate, makes them kill  
Living on the good will of a greedy few  
Who pull the strings

Engines on, this is not our place to be

Dumb as they are they think they are alone  
Creation's crowning glory in the universe

Uh that's the way they do it  
That's the way they feel  
A planet that could offer more than you will ever need  
Uh that's the way they do it  
That's their place to be  
It seems we've found the darkest place in our galaxy

Now for a year we've watched their life  
A world of people full of lies  
And all their misplaced fear that  
Makes them hate, makes them kill  
Living on the good will of a greedy few  
Who pull the strings  
Engines on, this is not our place to be
