

Swords and Guns

RPWL

We only do what God wants us to do
We only do what God wants us to do

I want to take a story to it's course
A change in history like in a nightmare
Thousand of lives to set Jerusalem free
A change to peace we loved
And to defend the priest
Come and take up the sword

Not going, I'm not going home
Don't let me switch to my learnings
Not going, I'm not going home
I can see our star is rising
Left, right, left, right, straight ahead
Your disbelief will cost you death
We gon' do what we want to do
It's not that hard to(?)

We only do what God wants us to do
We only do what God wants us to do
We only do what God wants us to do

Swords and guns, wherever sin may be
And the night came on
Face to face we'll meet, with the Lord on our side
We'll start to kill them all
Just start with basic needs against the needs of world
The spirit and the spree, soon will be no more

Not going, I'm not going home
Don't let me switch to my learnings
Not going, I'm not going home
I can see our star is rising
Left, right, left, right, straight ahead
Your disbelief will cost you death
We gon' do what we want to do
It's not that hard to(?)

We only do what God wants us to do
We only do what God wants us to do
We only do what God wants us to do
We only do what God wants us to do
We only do what God wants us to do
We only do what God wants us to do
We only do what God wants us to do
