

# One Side

Ruben Studdard

One side of this story  
Your side of this story  
One side of this story  
Your side of this story

Uh, tell your mother, it's alright  
Tell your sisters and brothers, it's okay

Your friends are on the way  
Tell em calm down  
Cause they don't even know  
We going to work this out

Cause that's how it starts, right there  
Telling everybody round here  
What's going on between this  
We can't let em all in here

Cause everybody ain't for us  
Specially me  
When they only hear

One side of the story and that's your side of the story  
Then they make up their own story  
I wonder if they only heard my story  
That I love you only, baby, can't you see  
They don't know about you and me

I got an idea we should get away  
Somewhere with a view of the ocean for a couple days  
All night we could make make up to break up love  
And clear our minds, nobody there but us  
And if the phone rings, let it ring  
If there's a knock at the door, let em knock  
If it's the end of the world, let it end  
At least I'll be with my girl

Cause everybody ain't for us  
Specially me when they only hear

One side of the story and that's your side of the story  
Then they make up their own story  
I wonder if they only heard my story  
That I love you only, baby, can't you see  
They don't know about you and me

When they see ya cry  
They don't know I'm hurt  
When they feel your pain  
They don't know I'm worse off  
But I hold it in til I see you again  
Cause I don't wanna answer to nobody but you

One side of the story  
Your side of the story  
One side of the story  
They only hear one side of the story

And that's your side of the story  
Then they make up their own story  
I wonder if they only heard my story  
That I love you only, baby, can't you see  
They don't know about you and me

They don't know what we know  
One side of the story and that's your side of the story  
Baby, tell them that they don't know what we know  
One side of the story and that's my side of the story
