

Summer Love

Rudimental

I like the way you leave me with a taste of my tongue
I like the way you whisper when you tell me you love me
I swear that I can give you every breath in my lungs, yeah
As long as you can promise that you'll be here to hold me

Oh, I can't wait to fall into this web you've spun
No, I don't wanna get back up, just keep me now

Summer, summer love, keep me high
I'm all alone, won't ya stay a while
Summer love, by my side
We can rule the world, just you and I

Summer love, by my side
We can rule the world, just you and I

I love the way you hold me with the words that you say
You're the only one that listen me when there's no one around
It may not last forever but I guess it's okay
As long as you can love me just one last time

Oh, I can't wait to fall into this web you've spun
No, I don't wanna get back up, just keep me now

Summer, summer love, keep me high
I'm all alone, won't ya stay a while
Summer love, by my side
We can rule the world, just you and I

Summer love, by my side
We can rule the world, just you and I

Summer love, by my side
We can rule the world, just you and I
Summer love, by my side
We can rule the world, just you and I

Summer love, by my side
We can rule the world, just you and I (you and I)
Summer love (summer love), by my side
We can rule the world (rule the world), just you and I

Summer love, keep me high
I'm all alone, won't ya stay a while
Summer love, keep me high (just stay a while)
I'm all alone (won't you stay a while), won't ya stay a while
