

## Creatures In Your Head

Run River North

All the little creatures in your head  
Never meant to say their names out loud  
I can see the feet they're growing  
You better catch them while you can

I can see the people they've become  
In the blink of an eye they're ten feet tall  
Look just like you, look just like me  
But made to make you feel so small

True and false it's all at once  
You never give back what costs so much  
This kid that runs through heart and head  
Racing you to the bitter end

I can see the creatures in my head  
Never thought I'd find them next to you  
Oh we don't need to satisfy them  
And they don't need to be inside

True and false it's all at once  
You never give back what costs so much  
This kid that runs through heart and head  
Racing you to the bitter end
