

Slow Fade

Ruth B.

Late nights, are you sleepless too?
Wide awake in the starless blue
Staring up at the ceiling
Do you feel what I'm feeling
Little fights at the weekend do
You love me better when I'm not with you
We were built like concrete
I used to know your heartbeat

The light has disappeared
The dust has settled here
But still I want you near

So I been waiting for that slow fade
Kinda hoping that you won't stay
There's no color in us lately
And it's too hard to say
I been praying that we'll lose our love in slow fade

Crazy how it was me and you
From the start of the sun and moon
Held each other through it
We were young and foolish
Now we're dancing like we're done
We found the end of the moon and sun
Was it always like this
Cuz now it's always like this

The light has disappeared
The dust has settled here
But still I want you near

So I been waiting for that slow fade
Kinda hoping that you won't stay
There's no color in us lately
And it's too hard to say
I been praying that we'll lose our love in slow fade

Maybe I'll find you again, maybe I won't
I think for now that it's best if we let it go
I hope you get all you want out of this life
Even if it's not with me by your side

So I been waiting for that slow fade
Kinda hoping that you won't stay
There's no color in us lately
And it's too hard to say
I been praying that we'll lose our love in slow fade
I been praying that we'll lose our love in slow fade
