

Daylight

Ruti

I wanna hibernate forever
In the memories, I'm better
It's a quiet place
Oh, I'm so tired
Underneath the weather
Colder than I can remember I don't like the change
Is that alright

The night comes around so quick these days
And I'm still wide awake
There's too much time to chase
In blue I've tried to paint a different shade
It only turns to grey
I don't see why I should have to wait for

Daylight
Bring me back to life
Illuminate my eyes
Come and free my mind
I'm not waiting
My hearts on a landslide
I'm ready to collide
Cos I don't see my self getting over
Over over

I feel the heaviness on my head
But the explanations unclear
Don't you hide from me
When I'm this tired
Is their more I'm not aware of
If I break it down will I still find a bitter taste
I'm terrified

The night comes around so quick these days
And I'm still wide awake
There's too much time to chase
In blue I've tried to paint a different shade
It only turns to grey
I don't see why I should have to wait for

Daylight
Bring me back to life
Illuminate my eyes
Come and free my mind
I'm not waiting
My hearts on a landslide
I'm ready to collide
Cos I don't see my self getting over
Over over

Daylight
Bring me back to life
Illuminate my eyes
Come and free my mind
I'm not waiting
My hearts on a landslide
I'm ready to collide

Cos I don't see my self getting over
Over over
