

Big Lie

RVIVR

Running through trees
And I'm trying to breathe back into my dream
Ripped up my roots like there's someplace that I gotta be
If someone had told me how this would unfold
How we'd build up this thing just to point out the holes
Gasping as the sky falls

It's a great big lie I believe sometimes
It's got me it's got me it's got me
Pulls me down
Til the lightning strikes like a little flash of day in
the night

The band keeps on playing
No idea what they're saying
I try not to care but is anyone there?!

So what if I'm dreaming impossible dreams and I fly by
night?
I come from the stars and I'm not afraid to die!!
What's the mistake in impossible dreams?!
We can fly by night!
Everything's changing
There's beauty between the lies
