

clouds

Rxseboy

If you wanted the clouds
I would climb up a mountain
If you want a big house
It'd come with a fountain
And maybe a hot tub
The size of an ocean
If you wanted real love
I'd give my emotions all to you

Do you know what you're doing to me?
Burning up for you I swear it's like a hundred degrees
Put my trust in you, and you don't even know that means
You've been focused on you, you always chasing your dreams yeah

I'll support wherever you wanna go
I can't take you there, but I could help with paving the road
Ain't gotta do what your told
Just stick to breaking the mold
In the end, I just hope that you know that

If you wanted the clouds
I would climb up a mountain
If you want a big house
It'd come with a fountain
And maybe a hot tub
The size of an ocean
If you wanted real love
I'd give my emotions all to you

All to you
I wanna show that I'll ball for you
It's not the time I should fall for you
I know that you gotta do what you gotta do
If you need the assistance, I'll be right there
When you glow up, then they might stare
Girl it's no rush, yeah they broke us
Throwing no punch and we fight fair

One step back, but I'm never retreating
'Cause I need my space, energy is depleted
You can have my word, always keeping the secrets
I'll be everything that you ever needed

If you wanted a break
I hope that you get one
If you wanna wait
I hope that you press on
If everyone's fake
Then I'll be the real one
I know you want real love

(1, 2, 3, 4)

If you wanted the clouds
I would climb up a mountain
If you want a big house
It'd come with a fountain

And maybe a hot tub
The size of an ocean
If you wanted real love
I'd give my emotions all to you

If you wanted the clouds
I would climb up a mountain
If you want a big house
It'd come with a fountain
And maybe a hot tub
The size of an ocean
If you wanted real love
I'd give my emotions all to you

One step back, but I'm never retreating
'Cause I need my space, energy is depleted
You can have my word, always keeping the secrets
I'll be everything that you ever needed
