

i'll be gone soon

Rxseboy

Yeah, small talking with my ghost friends
Real people keep on ghosting
I've been tryna find a new wave cause I'm sick of drowning in t
his ocean
People worried about exposure I'm just happy that I wake up
Say I'm keeping my composure till I realize every fucking day s
ucks
It's a lost cause, I'm a bad guy, not a popstar
I should fuck off, let me dig deeper
I should OD where's the grim reaper when I need him
You know, my way to live is receding
Won't find what I'm seeking
My soul needs a demon to rip it apart before I get to tweakin'
I'm done (I'm done)

All this poison in my head still
In this room I'm feeling dead still
Fuck around and take like 10 pills
I'd be gone but I'm getting bread still
Why do I gotta go through hell here
Need a time stopper let me chill please
Get a [?], write a quick note then its bye momma, uh
Gone in a flash, hit me with lightning
Rumbling thunder I'm done with the fighting
Done with the bullshit it was a pipe dream
Stuck on the night shift, sun isn't rising anymore
Guess I'll stick to liking dark rooms
Power's gone I'm in a monsoon
If it don't stop I'll be gone soon
I'll be gone soon, I'll be gone soon
