

## Let You Know

Rxseboy

We had a lot of problems  
I'm fallin' like it's autumn  
You liked the EP, make it for you, now we aren't talkin'  
The times we had were awesome  
I swear to God I'm sorry  
I had to leave regardless, swear this shit'll make me heartless  
I didn't want your love  
I didn't need affection  
I just wanted honesty and yeah, I liked that necklace  
And yeah, I liked the summer mornings when you made me breakfast  
We cleaned up all the messes  
I gave my full attention  
I told you when we go our separate ways, I'll make a song  
And I hope one day you can listen just to sing along  
I promise writin' this is not for me to right my wrongs  
I can't be right because I left you with my broken heart  
So now you know my pain, you know my sadness  
Went through the madness, felt the passion in my selfless actions  
I'm too distracted for your mind to focus on your classes  
I'm not the one, I understand this wasn't everlasting, wow

And like  
I'm just, I'm really sad about it

But I'ma never get too attached  
In like two years, be like "Who is that?"  
I might say "What's up?" you might call my bluff  
You start askin' shit, I might do the math  
God, I hope you find love  
Even if it ain't me  
Hope from him up above  
Clear your mind and you'll see that  
When I helped with chemistry we had that chemistry  
Mentally, I guess we weren't ready for the next couple centuries  
'Cause forever should be something special  
Love is something more than a letter  
It's not a template, it's expression in complex forms  
Maybe the best forms  
In like a year or so  
We should text more  
Don't take this serious  
It's just a metaphor  
And you know I care about you  
I just wanted to let you know

Also, before I forget  
Happy birthday  
And I hope we can talk again soon
