

let's question our existence together

Rxseboy

Godlow on the track

I question my existence
They hate on my resistance
They wanna know my nature
Just get about my business
I do a lot of fixing
She do a lot of bitchin'
That's why I'm getting crossed
But I am not religious
I found a better way of livin'
They won't ever know
And I been tryna plant a seed
I want to see it grow
I see 'em playin' make-believe
I never do the same
Cause when I die then it's forever
Life is not a game, yeah
Life is not a game

I'm on a battle
Feel like I'm fightin' just to make it change
Making change to pay the bills the labels takin' name
They wanna feed off my success
I guess they gettin' slain
A lot of place, now I'm back to the start
I'm really over, everything is like a stab to the heart
I'm going numb, this shit is dumb, got no respect for the art
They makin' song
They take it far
They get the check
And they gone

I see the consequences
I want no honor mentions
I want the glory for the story that I'll soon be tellin'
They tell me I'm a failure
But see I never failed
I simply learn from my mistake and I still prevail
I want it all like the earth and the universe
No one's ever done it everybody know I'll do it first
Keep my head high and still hit 'em with the lofi
Ridin' with windows open such a cold ride, why?

I question my existence
They hate on my resistance
They wanna know my nature
Just get about my business
I do a lot of fixing
She do a lot of bitchin'
That's why I'm getting crossed
But I am not religious
I found a better way of livin'
They won't ever know
And I been tryna plant a seed
I want to see it grow
I see 'em playin' make-believe

I never do the same
Cause when I die then it's forever
Life is not a game

Doin' alchemy off the balcony
How could we've miscalculated by a century
Put me in the wrong time frame with the right mind frame
Dealin' with the mind games on top of my pain, ayy, yeah
Wish that I could figure it out
Chill with mac and see what's winnin' about
No one beginnin' my route
My empire is what higher than just flyin'
She just wants sex but I'm too busy with clients

I see the consequences
I want no honor mentions
I want the glory for the story that I'll soon be tellin'
They tell me I'm a failure
But see I never failed
I simply learn from my mistake and I still prevail
I want it all like the earth and the universe
No one's ever done it everybody know I'll do it first
Keep my head high and still hit 'em with the lofi
Ridin' with windows open such a cold ride, why?
