

too far gone

Rxseboy

Well, I don't really know why
But I know you were my sunshine
So bright in the sky, oh my
You were all mine but wow baby now

I'm too far gone for somebody to miss me
Let my heart get cold now the weather is shitty
I don't want none of these problems
But that's on me 'cause I never could solve 'em

Yo, pick apart my pieces I got nothing left
Told you every day that you've been gone
And started to accept, going through these messages
I probably should've never kept
Now I just wanna feel serenity inside of my mind though
A little bit of music late night while I drive slow
I used to tie you up on top the bed with a blindfold
Now I lay alone inside this room with my eyes closed
You used to follow where I go
Now you're busy living life on top the high road

I'm too far gone for somebody to miss me
Let my heart get cold now the weather is shitty
I don't want none of these problems
But that's on me 'cause I never could solve 'em
