

# Cop City

Ryan Adams

Living in a cop city  
Under the sun  
Tryin' to hang on to what I am  
Look at it go by  
A train moving way too fast  
Into the sun, and into the sky

Well I already know, I already know  
I can't let go so fast  
Well I already know, I already know  
I can't let go so fast

Whoa I'm onto your radar  
As if you were a battleship  
I just don't care, I don't give a shit  
Any of your cruisers, but they were from Mars  
And they all survived on chocolate bars

Well I already know that I can't have it, I can't have it yeah  
Well I already know, I already know that I can't have it yeah  
(Hold the G, Hold the G)

Staring into the void  
Throwing colors at the sun  
There just ain't nothin' it can hide  
Yeah!  
Watching you burn out  
And shatter your life  
Watching you barely fucking survive

Well I already know, I already know  
And you can tell me now  
But I already know, I already know  
You can tell me now

I already know, I already know  
So you can tell me now  
'Cause I already know, I already know  
And you can tell me now  
You tell me now!  
And you tell me now!  
You tell me now!
