

Help Us

Ryan Adams

Do you even know how dark it was
When I came crawling from the fire
Your name scratched into the paint on the walls
Beating the colors of desire

And a long sad refrain
Your voice
Angry as angels
Screaming my name

Running through my head
While the room goes soft as sand
And it's endless, endless
Help us, you gotta help us

Got brick walls like a maze
Running through my mind
Eyes like winters
And a heart like halls
With bars between me and the outside

I'm so haunted I wanna taste the polluted rain
I wanna walk on dead grass
Burning holes in the flag

And I'm not angry anymore
I'm just closed
Been in the lights too long again
And I can't see the shadow

And it's endless
Somebody help us
Endless

And a long sad refrain
Your voice
Angry as angels
Screaming my name

And it's endless
You gotta help us
You gotta help us

Help us
Help us

You gotta help us

Help us
