

# Imminent Galactic War

Ryan Adams

This is a peaceful planet  
We didn't start the wars  
Our systems rich with planets  
We mine for crystal we export  
It fuels their battleships  
We knew one day they'd come  
Once all the weaker systems  
Fell devastated from pollution  
Battleships above  
We are now monitored  
They're planning an attack  
This war is imminent  
Imminent war  
Battleships monitor us  
Hovering above our cities  
Blacking out our suns  
Vega is devastated  
Fallen under control  
Ghorgon sent the robot army  
Electro snakes electro snakes  
Vega wasn't monitored  
They were annihilated  
Here they're using mind control  
On those of us with information  
They monitor us  
The ships black out the suns  
Battleships now in formation  
The war is imminent  
Imminent war battleships monitor us  
Half of us frozen in fear  
The others under mind control  
Galactic war  
Battleships have come for fuel  
Imminent war  
To them we are no use  
Galactic war  
Total annihilation  
They'll kill us first then rape the planets of crystal  
Then destroy us  
Imminent war
