Take It Back

Ryan Adams

No one can hold us in the middle of the night
No one can ever know
Sometimes it's over and you just turn out the lights
And you let her go

Walk you home this one last time
And you say my name and it makes you cry
I will walk you home ill take you back
Take you back

Stare out the window watching cars roll by
People in the streets
I'm feeling restless like I'm running out of time
You're lying there asleep

I will walk some place alone
And I fell this shit inside my bones
It was always there I take it back
Take it back

Take it back, take it back
Take it back, take it back
Take it back

I see your numbers on the clock as they rise
And it's cold out on the street
You see me comin, ain't got nowhere to hide
The lights should be seen

No one can hurt us if we never have to cry
The things I said to you
We'll be forgiven if we have to say goodbye
I will but if we do

Walk you home just one more time
And you say my name and it makes you cry
I will walk you home, I'll take you back
Take you back

I'll take you back, take you back
I'll take you back, take you back
I'll take you back
