True Love

Ryan Adams

I was driving through the city
Down the streets that we were
Hand in hand
Arm in arm, a blur
Now everything's changing
I guess I am too
I was driving through the city
I was looking for you

But you're gone
We could try and run
We could try and run
But there's only one true love

We can never be right
If we're always wrong
We got nothing to say
And you say it's done
I can try harder
I can let you go
It don't even matter
If nobody knows

We could try and run
We could try to run
We could try to run
We could try to run
We could try to run
We could try to run
But there's only one true love
There's only one true love
