

Victims of the Ice Brigade

Ryan Adams

We are the
Victims of the ice brigade
Fallen at war
To defend control
Of our system
And the civilizations
We created
That the ice brigade destroyed
Thunder in the sky
Lightning bolts and black fire
Armies of robots machines collide
With our machines our children die
Electric fire
Electric fire
Machine against machine
Blood on the radar screen
Arm all the blasting machines
Suit up let's head to the front
Prepare the armory
Activate force fields
Load all the guns
Killing the ice brigade
Machine by machine until they rust
Destroy the ice brigade
And bring us the head of Gorgoth
We are the
Victims of the ice brigade
Fallen at war
To defend control
Of our systems
And the civilizations
We created
That the ice brigade destroyed
Ghorgon
