

Rhinestone

Ryan Beatty

Big boy knew a life jean jacket with the rhinestones
Cool kids said I'll never fall in love but I might though (I might though)
Got me feeling ways that I'll never feel, but I like the feel
First time, so fast, it was tight though
That's a body modification
'Cause you appear smart so

Forever changed, forever known
Going down, that's a lesson
Going up with the sky, fly, butterfly fly
Fly high

Come fly with me
There's so much more to see out there
You're the green
It's been a window right next to me

Flight down got me passing out fast from a cheap thrill
Woke up after noon, feeling good, took a Advil
But the jet lag ain't that bad, I'll get used to it (I'll get used to it)
Never seen your sky in the nighttime
That's a new area code
But you still look the same

Forever changed, forever known
Going down as a hero
Going up with the sky, fly, butterfly fly
Fly high

Come fly with me
There's so much more to see out there
You're the green
It's been a window right next to me
Come fly with me
There's so much more to see out there
You're the green
It's been a window right next to me
