

All We Have

Ryan Cabrera

Stay, stay where you are
We've come to far to put our fist down and give it up
Don't, don't leave me low
We've still got places to go and I don't know if I can make it there
alone

Let your eyelids close
Try to remember what we used to know
Long nights where every single star would glow
Let's go back, yeah
Anything you want I'll give it to you just don't leave
I could not imagine what my life would be
All we have is us
We're all we have

I'll wait, wait for your call
I'm still involve with you, in love with it all
I love the way you know me too well
I love your good, your bad, your sad, your happy
Your heaven, your hell

Let your eyelids close
Try to remember what we used to know
Long nights where every single star would glow
Let's go back, yeah
Anything you want I'll give it to you just don't leave
I could not imagine what my life would be
All we have is us
We're all we have

All we have is us
We're all we have
We're all we have

Let your eyelids close
Try to remember what we used to know
Long nights where every single star would glow
Let's go back

Let your eyelids close
Try to remember what we used to know
Long nights where every single star would glow
Let's go back, take me back
Anything you want I'll give it to you just don't leave
I could not imagine what my life would be
All we have is us
We're all we have
