

Feels Like Magic

Ryan Caraveo

Cause baby you the flyest
And the dopest
And when you standin' the room, I can't focus
And when you are not around everybody notice
And girl you gave me butterflies when I wrote this
Cause you the greatest and the baddest
They only hate cause they wish that they had it
You got everything girl you the whole package
And when I'm with you it feels like magic
Yeah

I think love is what I'm falling in
The brown and yellow hair looking like it's fall again
Wind blowing hair follicles are follicling
I'm feeling too fine I don't wanna call it fin
I just wanna call my kin
Tell em I'm happy now
Laying in the grass with chu
Blowing these happy clouds
Swimming where the waters blue
Running where the grass is green
Driving in my old school
Burning through this gasoline
Take us somewhere faraway
We never been before
Let them know we coming
Let them hear the engine roar
What I'm feeling makes me wonder how I could pretend before
How you put words together makes me wanna pay attention more
Not just an attention whore who likes the tension, or
Was rich at tending didn't have to tend the chores
Pardon all these metaphors
I'm just complimenting your brain
Cause I hope to hear it plenty more
Your not just another main chick
Who only wants to be famous
Always talking that same shit
I think it's getting real right now
Shit I think I'm in my feels right now

Cause baby you the flyest
And the dopest
And when you standin' the room, I can't focus
And when you are not around everybody notice
And girl you gave me butterflies when I wrote this
Cause you the greatest and the baddest
They only hate cause they wish that you have it
You got everything girl you the whole package
And when I'm with you it feels like magic
Yeah

We could lay up on the couch watching comedies
Cause when you stressed out I'm here to put your mind at ease
I picked a winner and got rid of all the nominees
So one day we could make the granddaughter that my momma needs
Cause I don't wanna be in and out of apartments
Lying through my teeth saying things I only part meant

Bunch a different girls only good in one department
No mam I do not want that à la carte shit
I want the whole meal
Baby you the whole meal
Just because I'm holding on doesn't mean you should hold still
Push you up against the fridge tell me how the cold feel
Know what chu doing to me
Baby girl your so skilled
So sweet and so divine and make the first move cause you want me to
Yeah girl I know the signs
Stepping over lines crossing over boundaries
I'd do anything for you if I know that you down for me
Never creeping I'm a rider for the right one
Staring at the stars with you while I light one
I think it's getting real right now
Shit I think I'm in my feels right now

Cause baby you the flyest
And the dopest
And when you staying in the room, I can't focus
And when your not around everybody notice
And girl you gave me butterflies when I wrote this
Cause you the greatest and the baddest
But they only hate cause they wish they had it
You got everything girl your the whole package
And when I'm with you it feels like magic
