

# Paradise

Ryan Caraveo

Paradise is a place that's far from home  
And lately all I ever see is everything I've ever known  
Paradise...

Lately I've been dropping ecstasy (ecstasy)  
Never done it but I tried it just to see (just to see)  
Chasing freedom like I'm running out of youth  
Ask myself what makes me happy  
I can't seem to find the truth  
People ask me what I do  
I say that I'm chasing dreams  
I know they just think I'm crazy  
Putting faith in make believe  
I don't blame them  
I don't blame them  
Cause some days I think the same  
Like I've been wasting my time  
But I don't got no time to change  
I done cheated  
I done cheated  
Every time I've been in love  
Chase the girl who doesn't care at all  
And hurt the one who does  
I was raised to just forget about 'em  
Yea that's how I grew  
Every years a different state  
Every grades a different school  
Every couple years or so  
Dad brought home a different mom  
Brothers sisters come and go  
What the fucks a family bond  
I, just wanna fly to anywhere but where we are  
So, take me away and take me high and take me far  
Cause

Paradise is a place that's far from home  
And lately all I ever see is everything I've ever known  
Paradise is a place that's far from home  
And lately all I ever see is everything I've ever known  
Paradise...

Lately I been dropping two at a time  
It doesn't faze me now I'm doing just fine  
And as of lately I been breaking the law  
Chasing this money I'm not making every day of my job  
Yea that is the evil that will kill this race  
Nobody feeling safe  
Kids concealing face sealing fate  
Just to fill a safe  
Robbin steal yo vases while your faces in a pillow case  
We in a gorilla state  
Chasing bigger real estate  
Now we risking realer stakes  
Ain't no time to feel mistakes  
Ain't no extra reals it takes  
Tell me how much wills it takes  
To stop this cinema

And the sins you administer  
Cause when its finished  
You'll see these minutes are just miniature

I tend to pop em when I'm kinda stressed  
And I, do not really mind the side effects  
And I, just wanna fly to any way but where we are  
So, take me away and take me high and take me far  
Cause

Paradise is a place that's far from home  
And lately all I ever see is everything I've ever known  
...
