

# Supernova

Ryan Caraveo

Just desperados  
With no destination  
No history, no list of friends, no reputation  
Just a wanderlust  
Castin' spells at the wanderlust  
Oh they love to watch us burn  
But they would hate to be one of us  
Cause we are the only thing keeping us warm  
But we'll eventually freeze  
We're feelin' the heat when we touch  
Cause seein' the breath that we breathe  
And we can't replay all these moments  
Once we're resting in peace  
There's no second chances for you  
There's no resurrection for me

We don't waste time (on the things we can't control)  
Yeah all my friends are fuck ups (I don't be with fancy folks)  
Put poison in our bodies (we don't need no antidote)  
Maybe we just like to do (anything we can to cope)

You and me baby  
We're just a couple of stars  
One day we're gonna burn out  
For now we light up the dark  
We could disappear and all  
They couldn't tell from afar  
They love watching us burn  
But they don't know who we are  
Supernova  
Supernova  
Supernova

If I vanish tomorrow (gone)  
If I perish tonight (night)  
Don't dwell on my death (death)  
Just cherish my life (life)  
Keep climbing as high as you can (can)  
Don't be scared of the heights  
Do it as big as you can at all costs my dawg  
Don't not be scared of the price  
We burnin' out twice as fast as the rest (rest)  
How tragic the mess  
Livin' our lives and laughing at death  
We are just galaxies packaged in flesh (flesh)  
Don't know where we'll end up (no)  
By the end of the night (night)  
But I'm not afraid of the end  
Long as I'm endin' it right

Maybe I am just a dreamer (but at least I feel alive)  
Spend my money when I get it (it won't be there when I die)  
If I feel it then I do it (I don't need a reason why)  
Baby you and me are livin' other people just survive

You and me baby  
We're just a couple of stars

One day we're gonna burn out  
For now we light up the dark  
We could disappear and all  
They couldn't tell from afar  
They love watching us burn  
But they don't know who we are  
Supernova...
