Designer pain, YSL, young sick and in love  
Young sick and in love, yeah

Yo it's that summertime vibe, summertime flow  
When the sun is gone, tell me where that summertime go  
Fancy clothes never could disguise the pain  
When them tear drops fall they turn your skies to rain  
Girl you did something to me, said "Ryan, pursue me"  
The thrill was gone you and your man was just roomies  
So I made a movie (action), the deal was sealed (sup)  
And word to my mother, yo we felt one another, right  
Perfect thighs, pretty eyes, I was hypnotized  
You knew I was half crazy but you empathized  
You threw out your cards, said you play to win  
Anything I ever dreamed you were greater than  
Even in the winter time you was my summer  
We went for it, you lit up my life no wonder  
You were my sun animal you loved the sun  
For a short time I was the one  
We had fun right?

Love strong  
Playing in the background it's our love song  
Make me reminisce about our love gone  
Girl, I really miss you when our song's on

Yo, it's visions of you and I through my retro frames  
My mama would ask why I love these ghetto things  
But it's gold chains and jewelry till I'm in the cemetery  
Girl I know you love me 'cause I'm hung like a jury  
Plus I, I subsidized your high cost of living  
In return you felt the pressures that a boss was given  
I pray to God that my sins is all forgiven  
So when it come to the end we can still be friends  
Listen - you know why break ups cost so much  
You get your girlfriends involved man they talk too much  
They be hating on the boy, say he floss too much  
Cause they see us getting ours and they sicker than ever  
But uh, you know I got you baby, I do it for you  
Anything you need I'm here to support you  
I know them lonely nights be torture  
But I swear to God I never ignored you, I adored you

We both leave just to come back

Reminisce

Reminiscing, reminiscing, reminiscing  
Reminiscing, reminiscing, baby

Said you lighten up the sky  
Like the stars that shine, you are mine, you are mine  
On the late night baby  
Ooooh
