

# Lay Down

Ryan Leslie

Les

It feels so good to fly

The view is so beautiful from up here

She told me come and get her in that white horse

Hotel menu we take the night course

Then I lay her down in a bed of roses

She parts like the red sea spread for Moses

Is that really so ridiculous?

Take my time, she say Ryan's so meticulous

Attention to every detail

I'm a God, you a goddess of a female

Now these haters screaming blasphemy

Let em talk cause these hoes never last for me

If you looking for a G, homie ask for me

I hold on to my lady cause she would blast for me

Fire shots - take a bullet too

That's why they hate us for our love man it's bullet proof

In the line of fire I'm a pull her through

And when she's tired I'm a tell my baby lay down

Lay down (lay down)

Lay down (lay down)

I can hear you now (Let that body talk)

I can hear you now (Let that body talk)

Lay down (lay down)

Lay down (lay down)

I can hear you now (Let that body talk)

I can hear you now

I only count my wins, never count my losses

Late night G5 converse with bosses

We travel to an exotic place

Damn right I put a smile on that exotic face

She help me through my daily regimen

Hold me down make me better than I've ever been

A superhero to these other men

They may test but they don't know what they up against

Where're my ladies that appreciate that good D?

You ain't getting that from your man, girl, you should be

Ask my exes they'll tell you the way it could be

Just keep it real baby throw me back that good V

And I'll show you the way we get along

Tell them niggas leave our shit alone

They'll be mad when they hear this song

But you'll be happy when I tell you baby lay down

And as I lay you down to sleep

Trust me baby all your secrets I'm a keep

Be my angel, I'll be your protection

I can see my future girl in your reflection

Fly so high that it's heavenly

A better you a better me

It's better than amphetamines

Can we wait a while

Can we wait a while

Can we wait a while baby  
Wait a while

If you see me walkin' down the street  
If you  
If you see me  
Can we wait a while baby  
Wait a while

I'll do what you want me to, baby

You - you deserve a king  
I deserve a queen my love, my love  
You deserve a king  
You deserve a queen  
That you are  
That you are baby
