One Star

Ryan Stevenson

Wonder, breaking eastern skies
A diamond, a supernatural sight
A message, defying space and time

Reverence, a fire in my eyes
A presence, can cut it with a knife
Speechless, my heart is mystified

There was one star, one star alone in the sky
Changing the world tonight
And just one heart, one heart, flesh and divine
Heaven and earth collide
To shine hope into my life, with just one star

Silent and lonely manger scene
Holy ground, witnessing
The humble beginnings of a king, of my king

There was one star, one star alone in the sky
Changing the world tonight
And just one heart, one heart, flesh and divine
Heaven and earth collide
To shine hope into my life, with just one star

It's a miracle, supernatural sign
It's a miracle, changing the world tonight
It's a miracle, heaven and earth collide
It's a miracle, giving me hope tonight

There was one star, one star alone in the sky
Changing the world tonight
And just one heart, one heart, flesh and divine
Heaven and earth collide
To shine hope into my life, with one star
