

A Little Christmas

Ryland James

Got the heart of St. Nicholas, but the spirit of Scrooge
Can't hear sleigh bells ringing when you're singing the blues

Silent night in, why you hiding?
With a fire built for two
When the flame's slowly dying, got a light you can use

I can make you believe
Underneath this starry tree
We can build new memories
All we need is you and me
Let's rewind it to the time when
We lost that part of you
Let me show you, oh, oh
What a little Christmas can do
Ooh, ooh, little Christmas can do

Make your heart grow three sizes with your eyes all aglow
You'll be giving out kisses when there's no mistletoe

It's exciting, come alive when
You learn a thing or two
Now you're showing what a little Christmas can do

I can make you believe
Underneath this starry tree
We can build new memories
All we need is you and me
Let's rewind it to the time when
We lost that part of you
Let me show you, oh, oh
What a little Christmas can do
Ooh, ooh, little Christmas

Let me into the dreams that you keep in your head
We can stay there in blankets, all cozy in bed
Only gift that I need is the time that we spend
Oh, darling

I can make you believe
Underneath this starry tree
We can build new memories
All we need is you and me
Let's rewind it to the time when
We lost that part of you
Let me show you, oh, oh
What a little Christmas can do
Ooh, little Christmas can do

Ooh, little Christmas can do
Little Christmas can do
