

Anybody

Ryman Leon

I gotta ask you for my health
Is it more than parking at my house?
'Cause you didn't need to walk to school
Did you know how much I wanted you?
You would find me at the bell
You could've done this with anybody else
You kissed me, was that fake?
Class makes you not wanna look my way

And it hurts like hell
You'd never tell
It looks like you forgot me
Am I just anybody?
And it hurts like hell
The way it felt
And the way you forgot me
Now I'm just anybody
Anybody

Years pass and I notice with
Every new relationship
I try to prove that I don't care
When you're not even really there
And something happened when I saw you out
You looked right past me
How did I think you would come and say
It was more, but I was too afraid?

And it hurts like hell
Knowing you're well
Guess that means you forgot me
Now I'm just anybody
And it hurts like hell
The way it felt
Knowing that you forgot me
Now I'm just anybody

Anybody
Anybody
Now I'm just anybody
Anybody
Oh I'm anybody
Now I'm just anybody
