

# standing there

Ryman Leon

It's been a long four years  
It's had it's ups and it's downs  
We used to burn so bright  
But now that fire is out  
We had some ozone highs  
And then we fell through the clouds  
And no one's that surprised  
We ran it into the ground

So why are you still standing there?  
I thought you would've disappeared  
I wouldn't even blame you at all  
Cause people tend to leave when its hard  
So why are you still standing there?  
She said, I'm not going anywhere  
I'm not going anywhere

There were days that we fought and we made love  
And there were days we didn't talk but we made up  
And there were too many nights that we stayed up  
(It's a fairytale)  
Now it's just too late to save us  
And it was you apologizing to me  
And it was you who wanted to leave

So why are you still standing there?  
I thought you would've disappeared  
I wouldn't even blame you at all  
Cause people tend to leave when its hard  
So why are you still standing there?  
She said, I'm not going anywhere
