

Daylight

S. Carey

Hold true
All I knew
Somehow
Shattered when I met you

Grabbed your coat
Didn't know
I could feel this way again

I can't have this ghost follow me anymore
I don't want to go another day
Without you here

All the signs
That we find
Just not the right time
Wade into the stars

Catch the sun
Where's your head?
Will these shadows ever set?

I can't have this ghost follow me anymore
I don't want to go another day
Without you here

Here comes the daylight, daylight
We know it feels right, feels right
Here comes the daylight

Nights are long
Take our time
Somehow
There's a stillness that I find

On our backs
Talk all night
In starlit fields like daylight

In starlit fields like daylight

Here comes the daylight, daylight
We know it feels right, feels right
Here comes the daylight
