

# Straight from the Heart

S Club 7

I see my future there in your eyes  
Together and forever, it's you and me  
You see 'cause I won't be listening to what my friends have got to say  
I know they'll be there all the way

You promised, and I know that you will always care  
Through good times, and through bad times  
You're always there

Hold me now don't ever let it go  
I'm in love with you but you already know  
I want this love to last and be forever  
If you believe and you can only see  
That making love to me would make your life complete  
Hold me tight and say you'll leave me never  
Straight from the heart you've changed my life forever, forever more

I dream of waking up in your arms  
And watch the sun bring in the day  
You see, what I can imagine  
I am sure we can achieve  
Which means never giving up on this dream

You comfort and you guide me  
When skies are grey  
And I feel you, and I need you  
Just say you'll stay

Hold me now don't ever let it go  
I'm in love with you but you already know  
I want this love to last and be forever  
If you believe and you can only see  
That making love to me would make your life complete  
Hold me tight and say you'll leave me never  
Straight from the heart you've changed my life forever more,

Forever more  
Forever more  
Changed my life

You promised, and I know that you will always care  
Through good times, and through bad times  
You're always there

Hold me now don't ever let it go  
I'm in love with you but you already know  
I want this love to last and be forever  
If you believe and you can only see  
That making love to me would make your life complete  
Hold me tight and say you'll leave me never  
Straight from the heart you've changed my life forever

Straight from the heart you've changed my life forever
