

Close To Me

S-X

You should be right here, close to me
Nobody knows me like you know me
I wish we could just get back how we used to be
Cause baby you know it's only you for me

Thinking I might have to let you back in, yeah (Yeah, yeah)
Cause I don't like the way that we handled things, no baby
And surely there's gotta be something more for you and me, yeah
Cause love is a language I know with you so fluently (Yeah, yeah, mm)

I go the long way
Wrong way home, intoxicated
The love, hate won't change
Don't know if we'll make it
And some days I'm lonely
Knowing that we're jaded
Though it's not the same
You're still my baby

You should be right here, close to me
Cause nobody knows me like you know me
I wish we could just get back how we used to be
Cause baby you know it's only you for me

I know I need you right here, close to me
Nobody knows me like you know me
I wish we could just get back how we used to be
Cause baby you know it's only you for me

Oh yeah I know
You're heartbroken and won't open up
And you're scared to love again
Cause I've been there and I've seen it
Not focusing on feelings no more
I'm focused on healing
I can't lie though baby
I miss you and I need you

You should be right here, close to me
Nobody knows me like you know me
I know we can get right back how we used to be
Cause baby you know it's only you for me
