

Divided

S-X

Are you really riding
What if we divided
Can I really trust you
Where are you
When I need you
And all we do
Is fall
In and out of love
Is it you

You were all I'd need
But now I feel a way for real
We disconnected
There's nothing left here
But love in debt I owe
Is it love, is it hate
I don't know if it's safe
To call this love anyway
How are we here together
But our feelings are grey
Questioning is it real
Are you mine

And are you really riding
What if we divided
Can I really trust you
Where are you
When I need you
And all we do
Is fall
In and out of love
Is it you

Divided like a fork in the road
Except for all the highs and the lows
Then we go riding all smiling
You will love when we taking it slow
Screwed up and booed up you cooking the food up
I'm watching you make my plate
Now I'm scraping for more than I ever could get
I was starving to see your face
When I was out in the [?]
Now you are [?]
Division don't mean the amount
Banking on all of that
Banking but money could never reroute
Till the loss of your faith
Through the cracks that I paved
To keep the road we're on safe
Divide us all in our way
Which way is it you

Yeah I know there something wrong with all this [?]
I know like you I can't just keep pretending
Years gone by and I don't know what to tell you
Whole time that I'm with you I'm thinking

Are you really riding
What if we divided
Can I really trust you
Where are you
When I need you
And all we do
Is fall
In and out of love
Is it you
