

Fading Away

S-X

Cause you said you got nothing left and it's all gone
We don't have problems till you start one
And I know were changing, yeah
Is it worth us saving it?
And I know you'd hate to see my love go to
Another heart, give em what I showed you
Away we're fading, we're just fading away

You're giving me the signs, we need to take a break
Gone are days I'd see you in a wavy way
Told myself that you will be my last mistake
We tried to make it workout but it's just too late
I'm gettin to the work soon I'll be on the way
I know my songs will blow I'm just a drop away
I had your back when no ones thinking of you babe
That's how I know it's love it's really no debate
Now I got millys on my mind it's a long day
I ain't got the time for a problem babe
I just miss the time thinking of your face
On a tiny us baby what a waste
Countless times we tried and went the wrong way
Stop hiding how you feel say what you wanna say
I understand why you wanna walk away yeah

Cause you said you got nothing left and it's all gone
We don't have problems till you start one
And I know were changing, yeah
Is it worth us saving it?
And I know you'd hate to see my love go to
Another heart, give em what I showed you
Away we're fading, we're just fading away

Said oooh
I know that I misplaced
Your trust along the away
We both add to the flames
It's true
Never thought I would say that
Someone could take your place
But we just fade

I guess you live and you learn
You don't hear me no
Even though we both say
The cures conversation
No respect no patience
No victims no blame
We drifted away

Cause you said you got nothing left and it's all gone
We don't have problems till you start one
And I know were changing, yeah
Is it worth us saving it?
And I know you'd hate to see my love go to
Another heart, give em what I showed you
Away we're fading, we're just fading away
