

Something Better

S-X

I do not need this
I know why I
These are the reasons, the reasons why
I know it's for me, this temporary
Shit here won't last
I'ma make it fast
I said it, didn't mean it
I'ma prove you wrong
I can make things right
I don't care how long
I can see the light
And I'm feeling right
I know what I'm worth
It's more than a price

Something better there's gotta be for you and me
Something better there's gotta be I put you and me
Something better, there's gotta be for you and me
Something better for you and me or for you and me

Give me something to believe in
I don't feel good enough
This life that I've been leading
I might be giving up

Something better there's gotta be for you and me
Something better there's gotta be I put you and me
Something better, there's gotta be for you and me
Something better

Even if it's just a dream
Even if I'm left to dream
Even if it's just a dream
Even if I'm left to dream

You got so many questions which can only mean
You can't talk any lies
I'm no reaching for your attention
By your eyes on me for a lifetime

Something better there's gotta be for you and me
Something better there's gotta be I put you and me
Something better, there's gotta be for you and me
Something better

Even if it's just a dream
Even if I'm left to dream
Even if it's just a dream
Even if I'm left to dream
